

Alternative and Renewable Fuels and Vehicle Technology Program (AB 118)

What is the Alternative and Renewable Fuels and Vehicle Technology Program (AB118)?

Assembly Bill 118 authorizes the California Energy Commission to award approximately \$120 million annually as grants, loans, and other appropriate measures to qualified entities to develop and deploy innovative fuel and technologies to help achieve California's climate change goals. This program emphasizes increasing alternative and renewable fuels into the marketplace, without adopting any preferred fuel or technology.

What kind of projects will be eligible for funding?

Projects necessary to expand the production, delivery, and use of alternative and renewable fuels in California are eligible. Projects that improve vehicle efficiency, establish workforce training and public outreach programs also are eligible.

When will funding be available?

Funding will be available in late Spring 2009. The Energy Commission is developing regulations and an Investment Plan to determine funding priorities and opportunities.

How can I participate in the AB118 process?

We encourage your input as the regulations and Investment Plan for this program are developed. All workshops and meetings are open to the public and comments to the AB118 process are encouraged.

Visit www.energy.ca.gov/altfuels/ for more information or to sign up for our Alternative Fuels List Server.
